

Want to help solve one of the biggest challenges of our generation?

The pension problem - much like climate change - is slowly getting bigger and often only becomes apparent when it's too late. But it doesn't have to be!

FINABRO's mission is to help everyone do the right thing - for a comfortable and secure retirement in the future. As a start-up in the field of digital company pension plans, we are on a strong growth path. We are now 30 employees, in Austria and Germany, and have an ambitious growth plan.

We love what we do - and we love our team.

Become a part of it and help us solve one of the biggest challenges of our generation.

AWS / Java System Architect

Full-time / part-time (min. 30h) - m/f/d

Location: Vienna

APPLY NOW

Your future role:

As a System and AWS Architect you are mainly responsible for the technical improvement of the FINABRO platform, together with the Development Team. For this you are using the full potential and possibilities of Amazon Webservices.

- **You are the main driver**, together with the CTO and the Development Team, **to develop the FINABRO platform architecture further (Amazon Web Services, Java/Spring Boot, React).**
- **You are actively** involved as **Backend (Java)** and **Full Stack (Java & React)** developer as part of the DevOps Team.
- **You develop architecture solutions** especially focusing on extendibility, reliability, performance, security and data analytics in an agile team.
- **You bring your architecture experience** to the **team** and help your colleagues in all questions around architecture.
- You enjoy **continuous improvement** and an **agile development process**
- **You take an active role in the deployment** of new versions of our platform after every sprint, together with the teams in Vienna and Portugal.

You bring...

- **7+ years experience** in software development/engineering/architecture in a Java environment
- **Thereof 2+ years of experience with AWS** (Elastic Beanstalk, EC2, RDS Aurora, VPCs, ...)
- Knowledge of various development tools (Jenkins, git, maven, gradle, Datadog, Linux shell scripts, OpenVPN)
- Proven experience in the design and integration of **SOAP- und REST-interfaces**
- **Experience** in the insurance industry and the **integration of 3rd party systems and platforms** (e.g. core insurance solutions, Slack, MS Teams, ...) are a plus
- **Team player with excellent communication skills**
- **Motivated in continuous development and improvement**
- Fluency in **English** is a must, **German** highly welcome

FINABRO

What you can expect apart from exciting activities:

- **Flexibility:** The possibility (also independent of Corona) to work remotely and flexibly in terms of time - for us impact always counts more than presence.
- **Agility:** we are proud of our start-up mindset, we want to try out and implement new things quickly as an agile team.
- **Great team:** working in a highly engaged, dynamic, competent team with flat hierarchies and a very informal, friendly culture.
- **Personal development:** Your development is important to us. You'll have regular feedback sessions with supervisors and colleagues, and you'll be surprised how much you learn about yourself.
- **No boredom:** No day is like the other and holds new challenges.
